

I would like a piano because I could do many different things on it .I could learn more music and even teach myself new songs .I also would like a piano because I could play music for my friends and family .If I won a piano I would be so joyful .I would like a piano because I am talented.

I think I deserve a piano because music is a new part of me .It will remind me of how much I pushed myself all throughout BE INSTRUMENTAL .I think I deserve a piano because I would learn new things every time I played. I deserve a piano because I would never let my new hobby and talent go to waste .I also think I deserve a piano from BE INSTRUMENTAL because I will use my new talent forever.

If I won the piano from BE INSTRUMENTAL I would keep playing music like never before .When I say never before I mean I would keep pushing myself like I did when I had to learn my notes .I also mean that I would maybe consider playing the piano for a career, or major in college .If I won the piano from the essay contest I would get ahead on everything that we would learn on the following Wednesday in BE INSTRUMENTAL .I would also help teach my family members how to play the piano if they would like to learn .I would like to win the essay contest, because I could use this skill all of the time.
